

3 Simple Ways to Save Water and Money in the Kitchen

1. Washing dishes when the dish washer is full *can save 2,920 gallons of water and up to \$19 per year for a family of four.*
2. Replacing the old dishwasher with a new high-efficiency model *can save 1,314 gallons of water and up to \$8 per year for a family of four.*
3. Using a faucet aerator and change to a low flow faucet *can save 15,622 gallons of water and up to \$100 per year for a family of four.*

More water saving tips

- Wash fruits and vegetables in a basin and not under running water.
- Do not defrost food under running water; thaw in refrigerator overnight.
- Add food wastes to your compost pile instead of using the garbage disposal.
- Stop using the toilet as a trash can.
- Take care of household leaks and save up to 10% on your water bill.
- To detect leaks, check your water meter before and after two hours of no water use.
- Fix a constantly running toilet and save up to \$480 per year.
